

# Kako mogu da promenim verziju PHP-a na svom hosting nalogu?

Last updated July 15, 2026

Da biste izvršili promenu PHP verzije na željenom domenu, potrebno je prvo da pristupite vašem hosting nalogu tako što ćete se ulogovati na Vaš cPanel. Parametre za pristup ste dobili prilikom kupovine usluge i možete ih naknadno zatražiti putem kanala podrške.

Kad pristupite vašem hosting nalogu, na početnoj strani, pronađite kategoriju **Software** a zatim kliknite na opciju “**MultiPHP Manager**”.

(Alternativno koristite polje za “brzu pretragu” u gornjem desnom uglu).

Na novoj strani koja vam se otvori, nalaze se domeni i poddomeni koje imate na vašem hosting nalogu, kao i trenutne PHP verzije koje su podešene nad istim.

## System PHP Version

The system default PHP version is set by the system administrator.

Any domain that is set to the *inherit* value indicates that it does not have its own PHP version explicitly set. Read more about [inherit](#).

**PHP 8.3 (ea-php83)**

## Set PHP Version per Domain

Select the domains that you wish to change from the table, then apply a PHP version from the list.

**Warning:** PHP versions PHP 5.6, PHP 7.1, PHP 7.4, and PHP 8.0 are **deprecated**. We recommend that you update to a supported version of PHP. For more information, read our [PHP](#) documentation.

PHP Version

|                                     |                     |                                           |
|-------------------------------------|---------------------|-------------------------------------------|
| <input type="text" value="Search"/> |                     | <input type="button" value="Q"/>          |
| Selected <span>0</span>             |                     |                                           |
| <input type="checkbox"/>            | <div>Domain ▲</div> | <div>PHP Version</div>                    |
| <input type="checkbox"/>            |                     | PHP 8.0 (ea-php80)                        |
| <input type="checkbox"/>            |                     | PHP 8.3 (ea-php83) <span>Inherited</span> |
| <input type="checkbox"/>            |                     | PHP 8.3 (ea-php83) <span>Inherited</span> |

Označite sajt nad kojim želite da izvršite promenu PHP verzije, klikom na kvadratić ispred.

## System PHP Version

The system default PHP version is set by the system administrator.

Any domain that is set to the *inherit* value indicates that it does not have its own PHP version explicitly set. Read more about [inherit](#).

### PHP 8.3 (ea-php83)

## Set PHP Version per Domain

Select the domains that you wish to change from the table, then apply a PHP version from the list.

**Warning:** PHP versions PHP 5.6, PHP 7.1, PHP 7.4, and PHP 8.0 are **deprecated**. We recommend that you update to a supported version of PHP. For more information, read our [PHP](#) documentation.

PHP Version

Selected **1**

| <input type="checkbox"/>            | Domain ▲ | PHP Version                                 |
|-------------------------------------|----------|---------------------------------------------|
| <input checked="" type="checkbox"/> |          | PHP 8.0 (ea-php80)                          |
| <input type="checkbox"/>            |          | PHP 8.3 (ea-php83) <span>ⓘ Inherited</span> |
| <input type="checkbox"/>            |          | PHP 8.3 (ea-php83) <span>ⓘ Inherited</span> |

Zatim, u delu “**PHP Version**“, u padajućem meniju, izaberite željenu PHP verziju.

system administrator.  
indicates that it does not have its own PHP version explicitly set. Read more about [inherit](#).

## ain

from the table, then apply a PHP version from the list.

, PHP 7.4, and PHP 8.0 are **deprecated**. We recommend that you update to a  
rmation, read our [PHP](#) documentation.

PHP Version

PHP 8.1 (ea-php81)

Apply

Showing 1 - 3 of 3 items

PHP Version

PHP-FPM

Sačekaajte par sekundi da promena bude primenjena.

Ukoliko primetite 2 iste PHP verzije, prilikom odabira u padajućem meniju, izaberite onu  
gde u zagradi piše “**ea-php**”.

Zašto je nadogradnja PHP verzije važna?
